Project Name	AI-Augmented Backend Development AI BlogNest API
Maximum Marks	2 Marks

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A content creator or blogger.	Create and manage high-quality blog content efficiently.	Writing and managing blog content manually requires considerable time and effort, especially when creating multiple articles and summaries.	Traditional blog management systems mainly depend on manual content creation and organization.	Time-consuming and less efficient while managing regular content creation activities.
PS-2	A blog platform user or content manager.	A blog platform user or content manager.	Managing different content-related activities separately can make the overall process difficult and complicated.	There is a need for centralized content management, secure authentication, role-based access, and AI-assisted content processing.	Time-consuming and less efficient while managing regular content creation activities.
